## NEW CHRYSANTHEMUMS FOR YOUR GARDEN

**THE PLANTS WE SEND YOU** are well-rooted divisions of field grown clumps. Having been grown out of doors they do not have the lush, tender growth of the greenhouse but are strong and sturdy, already adjusted to the conditions of your garden.

**WHEN TO PLANT**—Spring divisions will be available from April 15 to June 1. We prefer to ship plants in May as they are larger then and in better growing condition. We will make certain that the plants reach you in plenty of time to develop to full maturity and loveliness.

**PRICES**—The prices given here are for spring divisions only. We send all chrysanthemum plants **POSTPAID**.

**PACKING**—Our plants are well packed to carry long distances. We will enclose with your shipment full instructions on the care of plants.

**ORDER EARLY**—Our supply of some of the newer varieties is limited. Order early to be sure of getting the ones you want. On the whole our supply is ample but in case there should be a shortage of some variety, we may substitute a similar color if in so doing we feel we are properly safeguarding the customers interest. If this is not satisfactory to you, please instruct us not to substitute.

We shall ship good plants, true to name, and deliver them in good condition. In case you wish to make any complaint, please write us within five days and give details. We cannot be responsible for results from the planting, as that depends largely upon the customer's interest, care and skill.

Blooming clumps, balled and wrapped, can be had during September and October by local customers. They will be priced in the field.

### NEW ENGLISH CHRYSANTHEMUMS

Try some of our new English chrysanthemums. They are early blooming and hardy. You will be amazed at their size and unusual forms and colors. You will find fully incurved flowers that remind you of big football mums. Then there are those with gorgeous reflexed petals in many delightful colors. The plants vary in size and habits of growth from quite low to tall and exhibit many types of foliage.

A few of these English mums will give you a new experience in your fall garden.

### ENGLISH CHRYSANTHEMUMS

<b>ADORATION</b> —Large pink flowers in a cream ground. Blossoms are flat with pointed petals. Early Sept.	
Each .....	\$ .60
<b>ALABASTER</b> —A very early white Very large, slightly incurved flowers that are full and firm. Very popular here. Aug. and early Sept.	Each .50
<b>ALFRETON BEAUTY</b> —Bright golden amber. Large reflexed blossoms. Good grower. Sept.	Each .60
<b>BADEN-POWELL</b> —An unusual coppery red that is very striking. Large flowers. Late Sept.	Each 1.00
<b>BALCOMBE GOLD</b> —This has bright old gold flowers that stand out in the garden. Free blooming vigorous plant. Sept.	Each .50
<b>BRIDESMAID</b> —A very large blush white with salmon overcast. Flower is large and heavy textured. Late Sept.	Each 1.00
<b>BRONZE BUTTERCUP</b> —A deep rich bronze with golden reverse. Very large and fully incurved flower. This perfect incurved form makes it very popular because it is unusual in garden chrysanthemums. The plant is strong growing and very hardy. Sept.	Each .50
<b>BRONZE FREDIA</b> —A lovely salmon-bronze with quilled petals. A tall plant with long stems for cutting. Sept.	Each .50

<b>COPPELIA</b> —A new shade, being a bright Indian red that does not fade. Sturdy plant. Sept.	Each	.60
